

**Under direct orders of the founder, access is limited to those with Overseer clearance.**

## **Overseer Clearance Granted**

**Item #:** SCP-0εε

**Object Class:** Euclid

**Special Containment Procedures:** SCP-0εε must be inscribed on a completely flat metal plate, and all corners of this metal plate must be right angles. Research on SCP-0εε must be conducted via a high-resolution camera from at least 40 meters away. No mechanically manufactured items with curves may appear within a sphere centered on SCP-0εε with a radius of  $SCP - 033^{SCP-033}$  meters. If SCP-0εε-1 is produced, a D-class personnel must transcribe SCP-033 onto SCP-0εε-1 to neutralize it, and the neutralized SCP-0εε-1 must be destroyed within 24 hours, with the D-class personnel being terminated within 24 hours thereafter.

**Description:** SCP-0εε was discovered on ██████████ / ██████████ / ██████████ in a pyramid in ██████████ by villager ██████████. It was initially inscribed on a ██████████ alloy plate with dimensions ██████████ by ██████████ by ██████████. After the villager came into contact with SCP-0εε and returned home, they found that their clothing and personal belongings had all turned into spheres. The villager reported the incident to the local government, which brought it to the attention of the SCP Foundation. SCP-0εε was subsequently contained at Site-██████████.

SCP-0εε, like SCP-██████████, appears as a set of complex mathematical symbols forming an equation,, whose "total value" equals the true value of pi. These symbols can be transformed into a traditional puzzle (see Addendum 2). SCP-0εε must be inscribed on a completely flat metal plate. If any mechanically manufactured item with curvature appears, its curved parts will gradually expand until, after 4096 seconds, it completely transforms into a contagious spherical object (spherification). These spheres are collectively referred to as SCP-0εε-1. SCP-0εε-1, upon contact with any spherifiable object, will assimilate it into another SCP-0εε-1.

Dr. ██████████ discovered that placing SCP-0εε and SCP-██████████ within each other's effective ranges will neutralize each other's effects. It is thus reasonably hypothesized that SCP-0εε and SCP-██████████ can form a unit after a certain operation.

**Addendum 1** Evidently, just as expressed by SCP-██████████, there must exist a more perfect system. ---- Dr. Morse

**Addendum 3** Directly observing *SCP-096* and then disclosing information about it to another person will result in both individuals entering a ██████████ state. This state causes, but is not limited to, ██████████, irrational causal bias (everything goes wrong), and ██████████. Warning: Do not disclose any information about *SCP-096* to others!!!
